

**Annexure 1. Complete list of all the proposals received across TCMF review Working Groups following the focused workshops.**

This Annexure to the draft Tokai and Cecilia Implementation Plan (IP) presents the full set of proposals identified in the submissions made by the respective TCMF review Working Groups (WGs) in Phase 2 of the process. The tables presented here group the proposals under the headings listed below and indicate the Working Group, the WG Reference, the verbatim WG Proposal, the IP Status\* and a reference to the section of the implementation plan in which the proposal will be dealt with.

The grouped topics presented hereunder are:

- Arboretum, ceremonies, medicinal gardens
- Biodiversity, alien species, rehabilitation and fire
- Tourism, recreation and recreational routes
- Planted Landscapes
- Tokai Manor, Manor surrounds and Tokai braai site
- Safety and Security
- Heritage, Environmental Education & Interpretation, Social Matters & Volunteers

Each proposal has been reviewed in terms of practicality, suitability and feasibility for implementation\* in the TMNP by SANParks, its partners and stakeholders as follows:

- ✓✓ represents proposals well suited for implementation;
- ✓ represents proposals suited for implementation with minor amendment;
- are proposals not feasible and/or impractical for implementation

\*Implementation is always subject to budget and resource availability.

**Arboretum, ceremonies, medicinal gardens**

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP section #
001	Heritage	Tokai Arboretum and Lister's Place	To reintroduce the information centre with appropriate material, exhibitions and collections. Modern ways to disseminate information must also be considered.	✓✓	Tokai Arboretum Upgrade	6.3; 7.2.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP section #
002	Heritage	Tokai Arboretum and Lister's Place	To restore the Arboretum Museum and make it functional again as a classroom, a venue for meetings and an area for exhibitions and talks.	✓	Tokai Arboretum Upgrade	6.3; 7.2.1
003	Health and Wellbeing	Tokai Arboretum	Create educational opportunities.	✓✓	Tokai Arboretum Upgrade	6.3.1; 7.2.1
004	Heritage	Tokai Arboretum and Lister's Place	To subdivide the collection of trees into smaller units and erect interpretive signage that includes a tree-list for each unit.	✓	Tokai Arboretum Upgrade	6.3; 7.2.1
005	Heritage	Tokai Arboretum and Lister's Place	To give honour to the fathers of forestry or the likes of Sir D.E. Hutchins and others	✓	Tokai Arboretum Upgrade	6.3.2; 7.2.1
006	Heritage	Tokai Arboretum and Lister's Place	consider a demonstration plantation or use the canary pine stand for education purposes	✓	Tokai Arboretum Upgrade	6.3.2; 7.2.1
007	Health and Wellbeing	Tokai Arboretum	Lister's reopened as a tearoom/restaurant, serving light meals, with information centre and curio shop, and an early learning centre	✓	Tokai Arboretum Upgrade	6.3.1
008	Heritage	Arboretum	Listers Place a building is an educational centre and not a tearoom	✓	Tokai Arboretum Upgrade	6.3.1
009	Facilities	Manor House & Arboretum – Short-term	Open Lister's now. Baboon monitor included. 4 years lease for kitchen upgrade funding	✓	Tokai Arboretum Upgrade	6.3.1
010	Heritage	Fynbos Heritage	To consider a piece of land for the cultivation of medicinal plants endemic to this area.	✓	Tokai Arboretum Upgrade	6.3.2; 7.2.2
011	Heritage	Fynbos Heritage	that land is allocated to the establishment for a medicinal garden in the area	✓	Tokai Arboretum Upgrade	6.3.2; 7.2.2
012	Heritage	Forest Communities	To consider land allocation for the establishment of a medicinal garden and that in the case of a breach of contract the permission is terminated according to the Protected Areas Act	✓	Tokai Arboretum Upgrade	6.3.2; 7.2.2

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP section #
013	Heritage	Tokai Arboretum and Lister's Place	To create a play-park for children – complete with a tree-house	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.3
014	Health and Wellbeing	Tokai Arboretum	Effective baboon management, appoint baboon monitors, Consider fencing in the Arboretum and Tokai Manor Precinct to prevent conflict with baboons.	✓	Tokai Arboretum Upgrade	6.3.2
015	Health and Wellbeing	Tokai Arboretum	Additional parking (per Tokai Manor Precinct Plan)	✓✓	Tokai Arboretum Upgrade	6.3.2
016	Health and Wellbeing	Tokai Arboretum	Exclude dog walkers, riders, cyclists	✓✓	Tokai Arboretum Upgrade	6.3.2
017	Heritage	Tokai Arboretum and Lister's Place	To determine a new theme for the Arboretum collection that will enhance the heritage value for generations to come, and to accommodate the new environment of indigenous vegetation without disregard of the forestry legacy that must stay in place. The planting of an avenue of indigenous trees on the edges can begin in the new winter season. Trees like the wild almond (used for Van Riebeeck's hedge), the mountain cedar that coppices after a fire, and other similar trees can be considered. An edge of real yellowwood is established along the northern border and the saplings are looking promising.	✓	Tokai Arboretum Upgrade	6.3.2
018	Health and Wellbeing	Tokai Arboretum	Appoint manager for maintenance of Arboretum (per guidance from Department of Forestry).	✓	Tokai Arboretum Upgrade	6.3.2
019	Health and Wellbeing	Tokai Arboretum	Proper markers for Arboretum (per guidance Department of Forestry)	✓✓	Tokai Arboretum Upgrade	6.3.2
020	Health and Wellbeing	Tokai Arboretum	Provide for wheelchair accessibility and benches.	✓	Tokai Arboretum Upgrade	6.3.2
021	Heritage	Tokai Arboretum and Lister's Place	To promote the three main arboretum principles: research, conservation and education. Recreation is an incidental outcome and may be used for the generation of funds	✓✓	Tokai Arboretum Upgrade	6.3.2
022	Heritage	Tokai Arboretum and Lister's Place	To extend the land of the Arboretum by including historic show-block land, by considering the 2012 land extensions and doing away with indentations	✓	Tokai Arboretum Upgrade	6.3.2

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP section #
023	Heritage	Tokai Arboretum and Lister's Place	Expand the Arboretum to the Redwood stand via the riverine corridor.	✓	Tokai Arboretum Upgrade	6.3.2
024	Health and Wellbeing	8.4.2 Upper Tokai area	Create a trail and treed riverine corridor using Afrotemperate seedlings to Redwoods along the water course.	✓	Tokai Arboretum Upgrade	6.3.2
025	Heritage	Tokai Arboretum and Lister's Place	To encourage responsible management with regards to vulnerable issues.	✓	Tokai Arboretum Upgrade	6.3.2
026	Heritage	Tokai Arboretum and Lister's Place	To investigate financing models of other state parks and arboreta that could be implemented.	✓	Tokai Arboretum Upgrade	6.3.1; 6.3.2
027	Heritage	Tokai Arboretum and Lister's Place	To involve teams to begin with river rehabilitation, the rehabilitation of the two wetlands inside the Arboretum, and to consider a water feature to enhance the ambience of the Arboretum.	✓	Tokai Arboretum Upgrade	6.3.2
028	Heritage	Tokai Arboretum and Lister's Place	To acknowledge problematic species and phase them out gradually, replace them with more appropriate species	✓	Tokai Arboretum Upgrade	6.3.2
029	Heritage	Tokai Arboretum and Lister's Place	To consider a rose garden of old species as they were once grown in the nursery (a heritage marker).	✓	Tokai Arboretum Upgrade	6.3.2
030	Heritage	Tokai Arboretum and Lister's Place	To indicate the nursery as a very important heritage site	✓	Tokai Arboretum Upgrade	6.3.2; 6.4.1
031	Heritage	Tokai Arboretum and Lister's Place	To make the Arboretum glass-free, smoke-free, gas-stove free, and free of veneration ceremonies that will upset the public	✓	Tokai Arboretum Upgrade	6.3.2
032	Heritage	Tokai Arboretum and Lister's Place	To upgrade the stand of California redwoods at Level 2 and fill the area with indigenous trees as used to be	✓	Tokai Arboretum Upgrade	6.3.2; 6.4.2
033	Heritage	Tokai Arboretum and Lister's Place	To upgrade the path network to all areas of the Arboretum, depending on the provision for extension	✓	Tokai Arboretum Upgrade	6.3; broader issue also addressed in 7.6.1
034	Heritage	Arboretum	Link the footpath system to a jog/running course	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.2
035	Facilities	Manor House & Arboretum – Short-term	Path clean-up with signage required.	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP section #
036	Heritage	Tokai Arboretum and Lister's Place	To "borrow" ideas from other arboreta and parks and to implement those according to the unique set-up locally: From the Paarl Arboretum the ramada or covered pergola with a table and benches and an open-air classroom made from stumps. From the Botanical Garden of Eden: an education centre for children and productive use of water features; from an arboretum in Switzerland (suggested by I. van der Merwe) a knotted rope walk (pictures available).	✓	Tokai Arboretum Upgrade	6.3; 7.2.1; 7.6.3
037	Heritage	Tokai Arboretum and Lister's Place	To rather flatten stumps for benches and paint them.	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.3
038	Heritage	Tokai Arboretum and Lister's Place	To consider an area where an amphitheatre can be laid out – the place must be accommodated to need of other users	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.3
039	Heritage	Tokai Arboretum and Lister's Place	A working nursery can attract visitors and income	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.3
040	Heritage	Tokai Arboretum and Lister's Place	Place warning signs under the Eucalyptus stand and avoid any public activities in that area	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.3
041	Facilities	Manor House & Arboretum – Short-term	Open upper parking for non-mobile & permit visitors (the elderly/ frail, disabled and children). Structured car guard. Clean-up is required. Wheelchair accessibility and benches	✓	Tokai Arboretum Upgrade	6.3.2; broader issue also addressed in 7.6.4
042	Heritage	Fynbos Heritage	To be considered: a granite fynbos self-interpretation garden in the old paddock, sub-precinct SW of manor (Above the previous pine parking lot of the Arboretum).	✓	Tokai and Cecilia Heritage Programme	7.7.1; 7.2.1
043	Heritage	Tokai Arboretum and Lister's Place	To plan for an application to upgrade the heritage status as the above is progressing	✓✓	Tokai Arboretum Upgrade	7.7.1; 6.3.2
044	Heritage	Geopolitical History: Tokai	To begin an advanced booking system on a yearly calendar to avoid conflict of religious groups interested in visiting Tokai.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP section #
045	Heritage	Geopolitical History: Tokai	To allow also non-indigenous people to gather in the manor precinct and to use the land for religious purposes	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
046	Health and Wellbeing	8.4.1 Cecilia area	Identify and create a sacred site for ceremonies and worship for First Nations people.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
047	Health and Wellbeing	8.4.2 Upper Tokai area	Create sacred site(s) for worship and ceremonies for First Nations people.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
048	Health and Wellbeing	8.4.2 Upper Tokai area	Corporate picnic area re-opened with link to Arboretum and Manor House – possible site for KhoiSan cultural centre.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
049	Facilities	Manor House & Arboretum – Medium-term	Khoi San overnight cultural “skerm” location, arena and cultural celebrations to be developed in the old corporate picnic site	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
050	Facilities	Manor House & Arboretum – Long-term	Khoi San Cultural centre at old corporate picnic site, as part an array of family & tourist educational visit offerings. Food, beverage & craft trade to make self-funding	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
051	Heritage	Geopolitical History: Tokai	To involve the Muslim heritage group to establish the presence of Muslim slaves	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
052	Heritage	Geopolitical History: Cecilia	To consider a set of rules for visitor behaviour as well as indigenous people or first nations and to keep transgressors accountable for any damage to property of SANParks or a heritage site.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
053	Heritage	Geopolitical History: Cecilia	To investigate the possibility of one national monument on the Table Bay side for the KhoiSan people. That a structure of national interest for the KhoiSan People be considered at a site that will have an excellent view of Table Bay, the West Coast, False Bay and the Plains towards Hottentots-Hollands	✓	The proposal falls outside of SANParks’ mandate but one which SANParks would support	
054	Health and Wellbeing	8.4.4 Lower Tokai	Create a working medicine garden for traditional healers from the First Nations People, working with experts in this field in the area due north of the Block A14c.	✓	Medicine gardens supported but not in an area of critically endangered vegetation. Gardens are planned to be located in Tokai Manor precinct.	7.2.2; 7.7.1; 6.1.2
055	Heritage	Geopolitical History: Tokai	To look into the matter of spiritual meetings where fire is used, and dagga is smoked during ceremonies – all smoking and fires should be prohibited with the exception of the Picnic area.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3; broader issue also addressed in 7.3.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP section #
056	Heritage	Geopolitical History: Cecilia	To revive the Park or arboretum on Rhodes Drive with paths, benches, name tags and a board with the tree names and a map given the difficulty to reach the upper site.	✓	Environmental Education & Interpretation	7.2.2
057	Heritage	Recreation	To restore the lower arboretum and/or park as an arboretum with paths, tags and/or name tags to the trees in Cecilia	✓	Environmental Education & Interpretation	7.2.2
058	Heritage	Recreation	To restore the legacy of Sir D.E. Hutchins on Cecilia where the Lister Arboretum on Cecilia is concerned.	✓	Environmental Education & Interpretation	7.2.2
059	Health and Wellbeing	8.4.1 Cecilia area	First Nations heritage walk created with markers, medicinal plants, rest, education, and ceremonial points.	✓	Environmental Education & Interpretation	7.2.2
060	Health and Wellbeing	8.4.2 Upper Tokai area	Heritage walk x2 (direct trail + via Jeep tracks) to Elephant's Eye created with markers, medicinal etc plants, rest and ceremonial points.	✓	Environmental Education & Interpretation	7.2.2
061	Health and Wellbeing	Tokai Arboretum	Ensure security – CCTV cameras.	—	The proposal is impractical given the activities of baboons and the canopy of trees.	

### Biodiversity, alien species, rehabilitation and fire

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
062	Health and Wellbeing	8.4.1 Cecilia area	Clear existing fuel loads, create fire breaks, co-ordinate volunteer clearing efforts, and consider and revise existing fire management plans and ensure fire management plans are adhered to.	✓✓	Fire Management	7.3.1
063	Fire	Create a wide low-fuel-load interface (up to 100 metres) against the urban edge / park boundary consisting of indigenous vegetation.	Urgent creation of a low-fuel-load interface (up to 100 meters) on the southern border of the Lower Tokai Plantation with the houses in Dennendal.	✓	Fire Management	7.3.1
064	Fire	Create a wide low-fuel-load interface (up to 100 metres) against the urban edge / park boundary consisting of indigenous vegetation.	The removal of all plantation trees in the urban interface zone	✓	Fire Management	7.3.1
065	Fire	Create a wide low-fuel-load interface (up to 100 metres) against the urban edge / park boundary consisting of indigenous vegetation.	No stacking of cut alien material in the interface zone;	✓✓	Fire Management	7.3.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
066	Health and Wellbeing	Lower Tokai safety	Provide protection from fire – ensure fire breaks are maintained, and fuel reduction and ecological burns are undertaken timeously. Understory of “forest” to be kept clear of woody debris.	✓	Fire Management	7.3.1
067	Biodiversity	Objective 4: Reinstate a natural fire regime at Tokai and Cecilia after plantation felling	Keep the urban edge clear of stacked material and slash.	✓✓	Fire Management	7.3.1
068	Biodiversity	Objective 4: Reinstate a natural fire regime at Tokai and Cecilia after plantation felling	Implement appropriate fire breaks with minimal impact on biodiversity, and which are as narrow as is practically appropriate.	✓	Fire Management	7.3.1
069	Fire	Create a wide low-fuel-load interface (up to 100 metres) against the urban edge / park boundary consisting of indigenous vegetation.	Maintenance of required firebreaks and a frequent and regular review of their position and dimensions.	✓✓	Fire Management	7.3.1
070	Heritage	Fire Management	To ensure that the fire-belt between the plantation next to Dennendal and Soetvlei /Sweet Valley is getting immediate attention given the leafy appearance of the suburbs and the Keyser Wetland.	✓✓	Fire Management	7.3.1
071	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	The continual reduction in fuel loads in heritage areas either through manual removal of material or stack burning.	✓✓	Fire Management	7.3.1 ; 6.3.3
072	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	No stacking of cut alien material adjacent to the heritage areas;	✓✓	Fire Management	7.3.1 ; 6.3.3
073	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	The removal of all plantation type trees adjacent to the heritage areas	✓	Fire Management	7.3.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
074	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	The maintenance of vegetation in heritage areas to prevent the establishment of 'ladder fuels' - especially important in the arboretum	✓✓	Fire Management	7.3.1 ; 6.3.3
075	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	Active removal of post commercial harvesting material either through burning or manual removal away from heritage areas;	✓✓	Fire Management	7.3.1
076	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	Maintenance of required firebreaks within the heritage areas.	✓✓	Fire Management	7.3.1; 6.3.3
077	Fire	Determine what the fire management access requirements are and the standard to which the tracks and footpaths should be maintained. There should be adequate signage that is useful in emergency situations.	Review the placement and positioning of fire-fighting related resources to ensure that they are adequately placed in the landscape e.g. placement of refilling of water and other resources	✓✓	Fire Management	7.3.1
078	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Undertake post-harvest restoration procedures: manage slash, clear aliens and conduct early autumn restoration burns.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.1; 7.3.2; 7.4.1
079	Biodiversity	Objective 5: Control and manage invasive alien plants at Tokai and Cecilia after plantation felling	Clear invasive alien plants using appropriate techniques and ensuring appropriate follow-up.	✓✓	Alien Species Management	7.4.1
080	Health and Wellbeing	8.4.2 Upper Tokai area	Invasives to be removed from ravines, and ravines to be treed with Afrotropical species. Natural forest expansion allowed out of ravines to increase tree canopy.	✓	Alien Species Management	7.4.1

	<b>Working Group</b>	<b>WG Reference</b>	<b>Verbatim working group Proposal</b>	<b>IP Status</b>	<b>IP Project / Programme</b>	<b>IP action #</b>
081	Heritage	Geopolitical History: Cecilia	To clear alien vegetation from the ravines and plant indigenous trees.	✓	Alien Species Management	7.4.1
082	Facilities	Upper Tokai – Short-term	Fully resourced sustainable alien vegetation containment plan required	✓✓	Alien Species Management	7.4.1
083	Health and Wellbeing	8.4.2 Upper Tokai area	Invasive alien clearing fast tracked, with necessary ecological and fuel reduction burns.	✓✓	Alien Species Management	7.4.1
084	Health and Wellbeing	8.4.1 Cecilia area	In areas already cleared, actively manage and control non-plantation alien invasive species to allow for fynbos restoration.	✓✓	Alien Species Management	7.4.1
085	Fire	Create a wide low-fuel-load interface (up to 100 metres) against the urban edge / park boundary consisting of indigenous vegetation.	Regular alien vegetation clearing (annually or at least every 2 years);	✓✓	Alien Species Management	7.4.1
086	Biodiversity	Objective 5: Control and manage invasive alien plants at Tokai and Cecilia after plantation felling	Invasive alien plant control is integrated with fire management and restoration.	✓✓	Alien Species Management	7.4.1
087	Biodiversity	Objective 5: Control and manage invasive alien plants at Tokai and Cecilia after plantation felling	Ensure high quality alien clearing and follow-ups.	✓✓	Alien Species Management	7.4.1
088	Facilities	Tokai	Natural fynbos burns are the post alien era target. Timing adjusted to reduce risk of runaway fires. Urban edges must be protected against ecological, fuel reduction burns and wildfires.	✓	Fire Management	7.4.1
089	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	Regular alien vegetation clearing (annually or at least every 2 years) in and around heritage areas;	✓✓	Alien Species Management	7.4.1
090	Facilities	Upper Tokai – Short-term	Better cut-to-burn plan. 500 tons dry stacking in burn season not acceptable	✓	Alien Species Management	7.4.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
091	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Update and implement the Habitat Degradation and Rehabilitation Plan Table Mountain National Park 2012-2017.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.1
092	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Incorporate the recommendations relating to Cecilia stream outlined in the Table Mountain Ghost Frog Action Plan into relevant plans and management action.	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.1
093	Biodiversity	Objective 2: Implement vegetation type specific restoration at Tokai and Cecilia after plantation felling	Update and implement the Tokai and Cecilia Park Restoration and Rehabilitation Plan 2014	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.1
094	Biodiversity	Objective 2: Implement vegetation type specific restoration at Tokai and Cecilia after plantation felling	Establish threatened species restoration monitoring programmes.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.1
095	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Update and implement the Source-To-Sea Management and Rehabilitation Action Plan for the Prinskasteel / Keyzers Rivers 2006.	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.1
096	Biodiversity	Objective 5: Control and manage invasive alien plants at Tokai and Cecilia after plantation felling	Prioritise clearing of invasive alien species along watercourses.	✓✓	Alien Species Management	7.5.1
097	Heritage	Environmental Education	To reach out to the people of the Flanders Nursery, in particular with regards to wetland conservation	✓	Biodiversity Restoration	7.5.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
098	Fire	Determine what the fire management access requirements are and the standard to which the tracks and footpaths should be maintained. There should be adequate signage that is useful in emergency situations.	An assessment of the condition of all tracks and paths in Tokai and Cecilia and their long-term rational use	✓✓	Recreational Activities & Events	7.6.1
099	Fire	Create a wide low-fuel-load interface (up to 100 metres) against the urban edge / park boundary consisting of indigenous vegetation.	Active removal of post commercial harvesting material either through burning or manual removal;	✓✓	Fire Management	7.3.2
100	Fire	Create a wide low-fuel-load interface (up to 100 metres) against the urban edge / park boundary consisting of indigenous vegetation.	Regular prescribed burning (at, on average, ten year intervals in Cape Flats Sand Fynbos & Peninsula Granite Fynbos areas) to keep the fynbos in this area 'young' with manageable fuel levels;	✓✓	Fire Management	7.3.2
101	Health and Wellbeing	Middle Tokai	Ensure fire management regimen, including fuel reduction and ecological burns within prescribed protocols - communities to be advised with due notice, test burns to be done to test for weather inversions.	✓	Fire Management	7.3.2
102	Biodiversity	Objective 4: Reinstate a natural fire regime at Tokai and Cecilia after plantation felling	Implement prescribed burning to achieve an average fire-return interval of 10 years for CFSF and 15 years for PGF.	✓✓	Fire Management	7.3.2
103	Biodiversity	Objective 4: Reinstate a natural fire regime at Tokai and Cecilia after plantation felling	Increase the block sizes that are burned to realise the prescribed burning schedule.	✓✓	Fire Management	7.3.2
104	Biodiversity	Objective 4: Reinstate a natural fire regime at Tokai and Cecilia after plantation felling	Stack burning should be kept to a minimum area, and only conducted in winter when the soil is wet, to minimise soil damage. Chipping and/or removal of stacks is preferable from a biodiversity perspective.	✓	Fire Management	7.3.2

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
105	Fire	Create a wide (up to 50 metres) low-fuel-load interface against the outer boundary of the heritage assets consisting of indigenous vegetation.	Regular prescribed burning (on average, a ten-year fire interval) to keep the fynbos in the areas surrounding the Tokai Manor heritage areas 'young';	✓✓	Fire Management	7.3.2
106	Fire	To manage identified areas of fynbos as distinct management areas that can be maintained and managed for biodiversity and fire safety	In the lower Tokai area, establish 5 to 6 fynbos areas of different ages that are separated by 2-3 years of growth.	✓✓	Fire Management	7.3.2
107	Fire	To manage identified areas of fynbos as distinct management areas that can be maintained and managed for biodiversity and fire safety	To not undertake prescribed burning in the middle and upper areas of Tokai that were burnt in the 2015 fire, until 2025.	✓	Fire Management	7.3.2
108	Fire	To manage identified areas of fynbos as distinct management areas that can be maintained and managed for biodiversity and fire safety	To divide middle and upper Tokai into burning blocks in preparation for future prescribed burning.	✓✓	Fire Management	7.3.2
109	Fire	To manage identified areas of fynbos as distinct management areas that can be maintained and managed for biodiversity and fire safety	To investigate further (but with urgency) a burning plan for Cecilia that can be implemented by 2025, once the pines and gums have been harvested as per the lease.	✓✓	Fire Management	7.3.2
110	Fire	To manage identified areas of fynbos as distinct management areas that can be maintained and managed for biodiversity and fire safety	To secure a budget for prescribed burning early on during the planning process.	✓✓	Fire Management	7.3.2
111	Fire	To manage identified areas of fynbos as distinct management areas that can be maintained and managed for biodiversity and fire safety	To see if and how the processes and conditions attached to City of Cape Town's burning permit can be reviewed and improved upon.	✓✓	Fire Management	7.3.2
112	Biodiversity	Objective 5: Control and manage invasive alien plants at Tokai and Cecilia after plantation felling	Monitor for EDRR species and implement rapid response.	✓✓	Alien Species Management	7.4.1
113	Biodiversity	Objective 7 To facilitate locally indigenous faunal diversity recovery at Tokai and Cecilia after plantation felling	Control alien animals species, such as sambar and German wasp.	✓✓	Alien Species Management	7.4.2

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
114	Biodiversity	Objective 7 To facilitate locally indigenous faunal diversity recovery at Tokai and Cecilia after plantation felling	Report emerging (EDRR) invasive alien species, for example Guttural Toad.	✓✓	Alien Species Management	7.4.2
115	Health and Wellbeing	Middle Tokai	Fast track wetland and riverine conservation, create shady groves and bird/animal hides for enjoyment and education.	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2; 7.5.1
116	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Update and implement the Working for Wetlands Phase 2 Planning Report Draft Rehabilitation Plan 2010 and Tokai and Cecilia Park Restoration and Rehabilitation Plan 2014 (also relevant to Soetvlei wetland).	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.1
117	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Manage threats to wetlands, including inappropriate infrastructure.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
118	Health and Wellbeing	8.4.4 Lower Tokai	Stabilise the riverbanks, slow water flow to boost wetlands and aquifer, encouraging a healthy underground biodiversity.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
119	Health and Wellbeing	8.4.4 Lower Tokai	Protect, preserve and maintain riverine corridors.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
120	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Manage water resources according to the principle of ecological reserves.	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
121	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Conduct a Wet-Health Assessment (to assess the present ecological condition of wetlands and their projected trajectories of change) in Tokai and Cecilia.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
122	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Use stream health surveys from the Freshwater Ecosystems of Table Mountain Project to assess current ecosystem condition and future responses to management actions.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
123	Health and Wellbeing	8.4.4 Lower Tokai	Create treed riverine corridor from Orpen Road to big bridge with groves of trees on either side of the river. Removal of gabions would allow the river to meander and the roots of trees would stabilise the riverbanks and slow water flow, creating a health underground environment.	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
124	Heritage	Recreation	To restore the damage of the riverbanks caused by horses and invasive vegetation and to restore riverine vegetation	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.2
125	Facilities	Cecelia Forest – Short & Long term	Fix jeep tracks emergency access & stop path rain water erosion	✓✓	Recreational Activities & Events	7.6.1

	<b>Working Group</b>	<b>WG Reference</b>	<b>Verbatim working group Proposal</b>	<b>IP Status</b>	<b>IP Project / Programme</b>	<b>IP action #</b>
126	Health and Wellbeing	8.4.1 Cecilia area	Implement baboon management plans and provide appropriate awareness for hikers and particularly dogwalkers.	✓✓	Recreational Activities & Events	7.6.1; 7.6.2
127	Biodiversity	Objective 4: Reinstate a natural fire regime at Tokai and Cecilia after plantation felling	Ensure effective, timely communication around planned prescribed burns.	✓✓	Fire Management	7.3.3; broader issue links to 7.8
128	Biodiversity	Objective 4: Reinstate a natural fire regime at Tokai and Cecilia after plantation felling	Increase awareness of fire prevention and management activities appropriate for a fire-prone environment.	✓✓	Fire Management	7.3.3
129	Fire	To improve fire awareness, education, and communication with neighbouring communities.	To continue to improve communication and relationship between the structures and the various agencies involved in fire management.	✓✓	Fire Management	7.3.3 ; broader issue links to 7.8.2
130	Fire	To improve fire awareness, education, and communication with neighbouring communities.	Develop awareness material that covers the different types of fire and risks	✓✓	Fire Management	7.3.3
131	Fire	To improve fire awareness, education, and communication with neighbouring communities.	Undertake awareness and open up communication with adjacent landowners on fire issues, concerns and opportunities for collaboration.	✓✓	Fire Management	7.3.3 ; broader issue links to 7.8
132	Fire	To improve fire awareness, education, and communication with neighbouring communities.	Implement communication around prescribed burning that includes the 'What, When, Where, Why and How'.	✓✓	Fire Management	7.3.3 ; broader issue links to 7.8
133	Fire	To improve fire awareness, education, and communication with neighbouring communities.	To make use of multi-media platforms to engage with communication and awareness, e.g. broadcast media, local newspapers, websites, social media, community forums, etc.	✓✓	Fire Management	7.3.3 ; broader issue links to 7.8.1; 7.8.5
134	Fire	Determine what the fire management access requirements are and the standard to which the tracks and footpaths should be maintained. There should be adequate signage that is useful in emergency situations.	Collect information and auxiliary information needed for fire planning, preparedness and operations.	✓✓	Fire Management	7.3.3

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
135	Fire	Determine what the fire management access requirements are and the standard to which the tracks and footpaths should be maintained. There should be adequate signage that is useful in emergency situations.	Package and make available information for parties involved in fire-fighting.	✓✓	Fire Management	7.3.3
136	Heritage	Geopolitical History: Cecilia	To erect notice boards prohibiting any form of fire where there are not already such notices.	✓✓	Fire Management	7.3.3
137	Heritage	Geopolitical History: Cecilia	To erect notice boards prohibiting any form of fire where there are not already such notices.	✓	Fire Management	7.3.3
138	Biodiversity	Objective 5: Control and manage invasive alien plants at Tokai and Cecilia after plantation felling	Make use of well-coordinated and appropriately trained volunteer groups.	✓✓	Alien Species Management	7.4.3
139	Heritage	Geopolitical History: Cecilia	To re-establish fynbos in the area.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
140	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Monitor passive vegetation recovery and map re-emerging communities.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
141	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Lower Tokai: The maximum area of CFSF at Lower Tokai needs to be protected and restored to meet national and international biodiversity targets and remain within the CFRWHS OUV criteria	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
142	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Actively reintroduce missing species following IUCN procedures.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
143	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Assess population viability of key species, and augment species and population numbers where necessary. Take care not to damage and change growth forms of recovering fynbos vegetation.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
144	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Manage direct threats such as poaching (including flowers, bulbs and bark), invasive alien species and erosion.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
145	Biodiversity	Objective 7 To facilitate locally indigenous faunal diversity recovery at Tokai and Cecilia after plantation felling	Investigate options for appropriate reintroductions of species (e.g. Table Mountain Ghost Frog in Cecilia, and small antelope and keystone invertebrates in Tokai).	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
146	Health and Wellbeing	8.4.4 Lower Tokai	Protect and preserve existing fauna.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
147	Biodiversity	Objective 7 To facilitate locally indigenous faunal diversity recovery at Tokai and Cecilia after plantation felling	SANParks continues to be actively involved in the Baboon Technical Team. Baboon management is a park-wide issue to be raised at the Park Forum.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
148	Facilities	Cecelia Forest – Short & Long term	Ensure animals (baboons) remain within the Park through ongoing monitoring.	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
149	Biodiversity	Objective 8: To prepare Tokai and Cecilia for climate change, through ensuring mitigation and adaptation through nature based solutions	Conserve and restore the maximum available extent of endemic biodiversity and associated ecosystem processes to build climate change resilient communities and adaptation corridors	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
150	Biodiversity	Objective 1: Restore biodiversity of Tokai and Cecilia for current and future generations, and in compliance with national and international agreements (HWS agreements and UOV criteria)	Involve citizen scientists in detailed surveys.	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.4

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
151	Biodiversity	Objective 7 To facilitate locally indigenous faunal diversity recovery at Tokai and Cecilia after plantation felling	Investigate options for improving connectivity between sites on either side of Orpen Road.	✓	Various traffic calming measures can be investigated in-conjunction with the City of Cape Town	
152	Heritage	Forest Communities	SANParks is getting into negotiations with Cape Nature and the Provincial authorities to address the situation in the Ondertuine. This should include the removal of manure from the original wetland area; the clearing of all alien trees and assistance in farming produces to increase their income	✓	Ondertuine are not within the Park. SANParks would support initiatives to address the situation	
153	Health and Wellbeing	8.4.4 Lower Tokai	Working with SANParks and conservationists, protect and preserve critically endangered Cape Flats Sand Fynbos contained within the existing central and northern sections of the park, while ensuring suitable density and height restrictions.	—	Cape Flats Sand Fynbos cannot be protected elsewhere in the Park as it only occurs in Lower and Middle Tokai	

### Tourism, recreation and recreational routes

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
154	Biodiversity	Objective 6 Control erosion at Tokai and Cecilia through maintenance and/or closure of trails and roads	Identify trails and roads for closure and rehabilitation. Minimise new and widening of tracks cutting across rehabilitation and core biodiversity areas.	✓✓	Recreational Activities & Events	7.6.1
155	Safety	p. 6 Ensure that emergency access routes are open, maintained and accessible	Maintain emergency routes and where necessary reopen closed routes (see proposal for map of new proposed tracks)	✓✓	Recreational Activities & Events	7.6.1
156	Fire	Determine what the fire management access requirements are and the standard to which the tracks and footpaths should be maintained. There should be adequate signage that is useful in emergency situations.	An assessment of the condition of all tracks and paths in Tokai and Cecilia and their long-term rational use	✓✓	Recreational Activities & Events	7.6.1
157	Biodiversity	Objective 6 Control erosion at Tokai and Cecilia through maintenance and/or closure of trails and roads	At Upper Tokai, keep only the level 5 road and Constantiaberg mast road; and repurpose other roads for recreation or decommissioning.	✓	Recreational Activities & Events	7.6.1
158	Biodiversity	Objective 6 Control erosion at Tokai and Cecilia through maintenance and/or closure of trails and roads	Reconsider downhill tracks.	✓	Recreational Activities & Events	7.6.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
159	Fire	Determine what the fire management access requirements are and the standard to which the tracks and footpaths should be maintained. There should be adequate signage that is useful in emergency situations.	Actively maintain or close tracks and paths, and rehabilitate where required	✓✓	Recreational Activities & Events	7.6.1
160	Health and Wellbeing	8.4.2 Upper Tokai area	Improved signage and safety precautions on multi-user jeep tracks.	✓✓	Recreational Activities & Events	7.6.1
161	Health and Wellbeing	8.4.2 Upper Tokai area	All tracks next to wine farms to be maintained properly so that mounted police can patrol, and commercial horseback activities can take place. In areas a double track may be required to avoid conflict with mountain bikers. Create shade route.	✓	Recreational Activities & Events	7.6.1
162	Biodiversity	Objective 6 Control erosion at Tokai and Cecilia through maintenance and/or closure of trails and roads	Set appropriate limits for use of trails, including seasonal trail closure if needed.	✓	Recreational Activities & Events	7.6.2
163	Facilities	Upper Tokai – Short-term	Expand on current usage, using signage, education & numbering for improved group control. Fix roads now & improve emergency access.	✓	Recreational Activities & Events	7.6.1; 7.6.2
164	Biodiversity	Objective 3: Restore rivers and wetlands at Tokai and Cecilia after plantation felling	Adapt engineering solutions for the roads to the dams on the Back Table, to dissipate rather than concentrate runoff water.	✓✓	Recreational Activities & Events	7.6.1; 7.6.2
165	Biodiversity	Objective 6 Control erosion at Tokai and Cecilia through maintenance and/or closure of trails and roads	Ensure sound maintenance of retained trails.	✓✓	Recreational Activities & Events	7.6.1
166	Health and Wellbeing	8.4.2 Upper Tokai area	Jeep and MTB cycle tracks restored and maintained, including effective drainage and erosion mitigation measures.	✓✓	Recreational Activities & Events	7.6.1
167	Biodiversity	Objective 6 Control erosion at Tokai and Cecilia through maintenance and/or closure of trails and roads	Monitor trail maintenance to ensure that surfacing materials brought in do not introduce alien seeds or harmful nutrients. Use of woodchips is not recommended, as it may introduce pathogens.	✓✓	Recreational Activities & Events	7.6.1
168	Health and Wellbeing	8.4.1 Cecilia area	Improve condition of jeep tracks and maintenance of trails to ensure the prevention of erosion.	✓✓	Recreational Activities & Events	7.6.1
169	Heritage	Geopolitical History: Cecilia	To maintain the single tracks with steps to prevent further erosion	✓	Recreational Activities & Events	7.6.1

	<b>Working Group</b>	<b>WG Reference</b>	<b>Verbatim working group Proposal</b>	<b>IP Status</b>	<b>IP Project / Programme</b>	<b>IP action #</b>
170	Biodiversity	Objective 6 Control erosion at Tokai and Cecilia through maintenance and/or closure of trails and roads	Involve volunteers in trail maintenance.	✓✓	Recreational Activities & Events	7.6.1
172	Facilities	Upper Tokai – Short-term	Use all tracks with signed crossing & fund earning events. Sharing amongst user groups.	✓	Recreational Activities & Events	7.6.1; 7.6.2
173	Facilities	Manor House & Arboretum – Short-term	Path clean-up with signage required.	✓✓	Recreational Activities & Events	7.6.1; 7.6.2
174	Health and Wellbeing	Tokai Arboretum	Exclude dogwalkers, riders, cyclists	✓✓	Recreational Activities & Events	7.6.2
175	Health and Wellbeing	8.4.4 Lower Tokai	Cycling restricted to soft cycling.	✓✓	Recreational Activities & Events	7.6.2
176	Health and Wellbeing	8.4.4 Lower Tokai	Widen paths through fynbos, and re-open old tracks for horse riders.	✓	Wider tracks and footpaths in critically endangered fynbos areas is not supported. Alternative recreation areas and routes can be explored through recreational EMP review processes.	7.6.2
177	Health and Wellbeing	8.4.4 Lower Tokai	Provide for wheelchair accessibility and paths throughout the area.	✓	Recreational Activities & Events	7.6.2
178	Health and Wellbeing	8.4.4 Lower Tokai	Create scenic family spaces at the big pools, including an informal children's play area at the Labrador Pool (next to the big bridge).	✓	Recreational Activities & Events	7.6.2
179	Health and Wellbeing	8.4.4 Lower Tokai	Create safe children's play and adventure areas, together with fun educational programs, which create a gateway to nature and conservation.	✓	Formalised play areas, are supported but not in an area of critically endangered vegetation. These are planned to be located in Tokai Manor precinct and possible also in the Tokai braai site.	6.1.1
180	Health and Wellbeing	8.4.4 Lower Tokai	Create a shaded grassed area for picnics, events and children's play area. Area to serve as a culturally diverse hub for events	✓	Formalised play areas, are supported but not in an area of critically endangered vegetation. These are planned to be located in Tokai Manor precinct and possible also in the Tokai braai site.	6.1.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
181	Facilities	Lower Tokai	Structured fynbos garden with educational, wheelchair access, herb garden, info boards, safe adventure climbing	✓	Formalised fynbos garden with educational, wheelchair access etc, are supported but not in an area of critically endangered vegetation. These are planned to be located in Tokai Manor precinct and some are possible in the Tokai braai site.	6.1.1
182	Health and Wellbeing	8.4.4 Lower Tokai	Identify and create areas for parking – in pine stand on the corner of Orpen Road and Dennendal West Avenue. (Block A19cw.)	✓	Formalised parking within the Park, is supported but not in an area of critically endangered vegetation. These are planned to be located in Tokai Manor precinct and possibly also in the Tokai braai site.	6.1.1
183	Heritage	Recreation	To redirect the exit road of the cyclists and horses from upper Tokai to the service road	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1
184	Health and Wellbeing	Tokai Manor House concession	Improved signage for all users, including tourism welcome.	✓✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1
185	Health and Wellbeing	Tokai Picnic area	Create childrens' bike park and possibly small skateboard park in underutilized section of picnic area	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1
186	Health and Wellbeing	8.4.2 Upper Tokai area	Horse and hiking trails to be developed, maintained and multi-purposed for commercial purposes (e.g. riding wine trails, endurance trails). Tokai to be a “destination” for horse riders, hikers and runners.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.2
187	Health and Wellbeing	Middle Tokai	Retain existing stables, heritage oak avenue, gums etc. as part of cultural and heritage landscape.	✓✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.2 ; 6.4.1
188	Health and Wellbeing	8.4.4 Lower Tokai	Provide for or support existing market opportunities for social upliftment through a Westlake focused craft market and the working herb and medicine garden in Block A14c.	✓	Formalised markets for social upliftment are supported but not in an area of critically endangered vegetation. These are planned to be located in Tokai Manor precinct and possible also in the Tokai braai site.	6.1.2

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
189	Health and Wellbeing	8.4.4 Lower Tokai	Create and maintain heritage and cultural programmes, particularly as pertains to First Nations People, including art installations	✓	Formalised cultural programmes, including art installations, are supported but not in an area of critically endangered vegetation. These are planned to be located in Tokai Manor precinct and possible also in the Tokai braai site.	6.1.3
190	Facilities	Manor House & Arboretum – Long-term	Khoi San Cultural centre at old corporate picnic site, as part an array of family & tourist educational visit offerings. Food, beverage & craft trade to make self-funding	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.3
191	Facilities	Upper Tokai – Short-term	A few are damaging relations and endangering with other visitors. A combination of SANParks presence (e-bikes) & numbering to assist	✓	Recreational Activities & Events	7.6.4
192	Facilities	Cecelia Forest – Short & Long term	Expand car park, with security & safe exit	✓	Recreational Activities & Events	7.6.4
193	Facilities	Cecelia Forest – Short & Long term	Build public toilets, correct parking security, serviced by coffee trailer operator	✓	Recreational Activities & Events	7.6.4
194	Health and Wellbeing	8.4.1 Cecilia area	Create toilet facilities at the parking area	✓	Recreational Activities & Events	7.6.4
195	Health and Wellbeing	8.4.4 Lower Tokai	Create toilet facilities.	✓	Recreational Activities & Events	7.6.4
195	Facilities	Short term Lower Tokai	Formlised car guards, safety in groups, coffee kiosk	✓	Recreational Activities & Events	7.6.4
196	Safety	p. 9 Bring in concessionary usage	Have vendors (food trucks, plant and curio sellers) at various sites	✓	Recreational Activities & Events	7.6.4
197	Health and Wellbeing	8.4.1 Cecilia area	Consider food truck for parking area	✓	Recreational Activities & Events	7.6.4
198	Heritage	Geopolitical History: Tokai	To bring the 1970 dog-walking permission in line with the new dispensation from 1994 out of respect for the suffering of the people who were forcibly removed from their land in Constantia	✓	Recreational Activities & Events	7.6.2
199	Heritage	Recreation	To complete an impact assessment on horse-riding and its impact on Tokai and Cecilia.	✓	Recreational Activities & Events	7.6.2

	<b>Working Group</b>	<b>WG Reference</b>	<b>Verbatim working group Proposal</b>	<b>IP Status</b>	<b>IP Project / Programme</b>	<b>IP action #</b>
200	Heritage	Recreation	Need for carrying capacity report and reconsideration of paddocks in sensitive area for horse-riding on Tokai Park	✓	Recreational Activities & Events	7.6.2
201	Heritage	Recreation	To relocate the paddocks in the sub-precinct of Tokai elsewhere to allow for the rehabilitation of the soil	✓	Recreational Activities & Events	7.6.2
202	Heritage	Recreation	To restore the damage of the riverbanks caused by horses and invasive vegetation and to restore riverine vegetation	✓	Recreational Activities & Events	7.6.2
203	Facilities	Upper Tokai – Medium-term	On-line permits as agreed	✓✓	Recreational Activities & Events	7.6.2
204	Heritage	Recreation	build a hiking track from Level 5 to the waterfall and from the waterfall to the Level 6 footpath	✓	Recreational Activities & Events	7.6.1
205	Health and Wellbeing	8.4.2 Upper Tokai area	Keep horse riding, hiking and trail running routes separate from cycle paths except where agreed to by both user groups and in line with user safety precautions	✓✓	Recreational Activities & Events	7.6.1
206	Health and Wellbeing	8.4.2 Upper Tokai area	Existing MTB area to be sufficiently maintained and developed to be a “destination” for mountain bikers.	✓✓	Recreational Activities & Events	7.6.1
207	Health and Wellbeing	8.4.2 Upper Tokai area	Create trails to link from Tokai to Cecilia for horse riders, mountain bikers, hikers and trail runners.	✓✓	Recreational Activities & Events	7.6.1
208	Health and Wellbeing	8.4.4 Lower Tokai	Create gateways - between the urban edge to core conservation areas.	✓	Recreational Activities & Events	7.6.1
209	Health and Wellbeing	8.4.4 Lower Tokai	Accommodate the needs of all community members – indigenous peoples, conservationists, rambles, dog walkers, horse-riders, runners, cyclists, families.	✓✓	Recreational Activities & Events	7.6.1
210	Health and Wellbeing	8.4.4 Lower Tokai	Provide opportunities for local and national tourism. Ensure signage with regards to rights of way, directions, regulations.	✓	Recreational Activities & Events	7.6.1
211	Health and Wellbeing	8.4.4 Lower Tokai	Ensure space between paths to accommodate diverse users – limit crowding.	✓	Recreational Activities & Events	7.6.1
212	Health and Wellbeing	8.4.4 Lower Tokai	Ensure that dog and horse trails – existing and new - are kept separate where possible.	✓	Recreational Activities & Events	7.6.2
213	Facilities	Lower Tokai	Build a bridge over Orpen road, maybe 3 x high bricked crossing, vegetated bridge with ramps.	✓	Various alternative, less costly and impactful traffic calming measures can be investigated in-conjunction with the City of Cape Town	

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
214	Facilities	Upper Tokai – Medium-term	Horse rides to Noordhoek via Ou Wa pad to Silvermine Village	—	Currently no horse riding permitted in Silvermine	
215	Facilities	Upper Tokai – Longer –term	Upper level access to drinking water to be considered for hot months.	—	Impractical to install water pipelines to this level in the landscape	
216	Health and Wellbeing	SANParks	Ring-fence funding by user groups for trail maintenance.	✓	Funding linked to SANParks funding cycles that have short, medium and long-term options	
217	Health and Wellbeing	8.4.4 Lower Tokai	Create safe overpass across Orpen Road - from lower to middle to upper	✓	Various alternative, less costly and impactful traffic calming measures can be investigated in-conjunction with the City of Cape Town	
218	Health and Wellbeing	Middle and Upper Tokai	Dogs permitted up to Level 1.5 – all dogs to be leashed at all times. Access to Level 1.5 via Tokai Section Office. Baboon monitors will be necessary.	—	This proposal is not supported due to additional conflict with baboons who are limited to these areas and conflict with other recreational users (cyclists and horses riders)	
219	Health and Wellbeing	8.4.4 Lower Tokai	Consider incorporating provincial land to the south of Lower Tokai into the national park but kept as shaded community space for enclosed dog play park and children/families	✓	This area is not suitable for incorporation into the Park and should best be reserved as City public open space area.	
220	Health and Wellbeing	8.4.1 Cecilia area	Create turning circle for horse boxes with place to offload and upload horses and riders	—	Limited space and parking already at a premium	
221	Health and Wellbeing	Tokai	Cable way to Constantiaberg mast per plans ex 2006 (subject to economic feasibility study). Additional parking would be required.	—	This large infrastructure project is not currently in the Park Management Plan	
222	Heritage	Geopolitical History: Cecilia	To restore the forestry cottage in the accommodation block and to rent it out as accommodation	—	The cottage will be retained as a Park Staff facility	
223	Heritage	Recreation	To restore the old picnic site in Cecilia.	✓	Informal picnicking in Cecilia is welcome	

## Planted Landscapes

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
224	Facilities	Picnic area – Short Term	Secure shade trees.	✓✓	Tokai Braai Site Diversification of use	6.2.1
225	Health and Wellbeing	8.4.1 Cecilia area	Protect and preserve Karri gums (Cathedral Grove) and heritage cork oak avenue	✓	Tokai and Cecilia Heritage Programme	6.4.1; 7.7.1
226	Heritage	Shade for recreation	To consider the historic oak hedges /lanes that were planted to act as windbreakers for the vineyards planted in the Ondertuine (Lower Gardens, Lion's Gate).	✓	Tokai and Cecilia Heritage Programme	6.4.1; 7.7.1
227	Heritage	Shade for recreation	To answer to the question: Is recreation in the shade on Tokai-Cecilia unique and a non-renewable resource? The same applies to commercial pine trees.	✓	Tokai and Cecilia Heritage Programme	7.7.1
228	Heritage	Shade for recreation	To professionally address heritage definitions that are currently used for shade and recreation and are not in line with South African Acts	✓	Tokai and Cecilia Heritage Programme	7.7.2
229	Facilities	Cecelia Forest – Short & Long term	Maintain shaded walks in valley sections	✓✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
230	Health and Wellbeing	8.4.1 Cecilia area	Create Afrotropical shade plantings along major walking trails	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
231	Heritage	Tokai Arboretum and Lister's Place	To plant the upper kloofs with indigenous species – the kloofs/ravines had timber wood during the Dutch era	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
232	Facilities	Lower Tokai - Longer Term	Shade trees along streams, Accepted principle. Extension of Tokai.	✓	Biodiversity and Ecosystem Services Rehabilitation	7.5.3
233	Health and Wellbeing	Middle Tokai	Replant hardwood grove around the Thatch Cottage	—	This area is to be restored as per the Tokai Braai Site realignment Environmental Authorisation	
234	Health and Wellbeing	Upper Tokai	Follow the Shout 4 Shade Proposal for shade provision viz. Formal planting between Tokai Arboretum and old gum stand and along the boundary with the wine farms	—	SANParks is unable to support these proposals for shade planting, but several alternatives have been identified: - Ongoing planting of Afro-temperate indigenous shade trees in areas where they naturally occur (e.g. Cecilia kloofs).	6.4.2
235	Health and Wellbeing	Upper Tokai	Replant the old gum grove area (Fairie Glen) with mixed species (non-invasive introduced and Afrotropical)	—		6.4.2
236	Health and Wellbeing	Upper Tokai	Extend Arboretum by minimum of 30m to south of stream, extended west to level 1 and north to include corporate picnic site link to old gum grove area (Fairie Glen via introduced species (non-invasive or 'sterile pines') to create permanent shade.	—		6.4.2

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
237	Health and Wellbeing	Tokai & Cecilia:	Retain stands of existing pines as a shade canopy between which tall-canopied local species and non-invasive exotics can be grown on a phased transition basis. Transition planting from pines to local species to commence as matter of priority in current plantation by creating 10, 15 and 30m clearings between pines planted with seedlings of Afrotperate and introduced non-invasive species.	—	- Planting of perimeter routes to provide 'broken shade'. - Planting along water courses where appropriate. - Identifying alternative, accessible, well-located areas of public land for extensive shade tree planting which will have negligible impact on protected biodiversity areas (e.g. Porter Estate, Firgrove Common etc.)	6.4.2
238	Facilities WG	Lower Tokai	Transitional tree planting, with non-invasive trees	—	- Existing shade areas such as the Tokai braai site, the corporate picnic area. - City green belt shade areas already provide substantial and accessible shade areas in the Tokai and Cecilia environs.	6.4.2
239	Health and Wellbeing	Tokai & Cecilia:	Retain existing plantation and allow thinning to allow Afrotperate forest to expand naturally into these "nursery" areas	—	- Investigate extending the plantation 'exit' lease for certain areas of the Tokai and/or Cecilia remaining plantation trees to continue for a further period to provide a phased approach to additional tree planting for shade provision inside and outside the Park as listed above.	6.4.2

### Tokai Manor, Manor surrounds and Tokai braai site

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
240	Facilities	Picnic area – Longer Term	Chrysalis entry via The Range for improved SANParks welcome entry. Reduce traffic past family destination	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1
241	Facilities	Manor House & Arboretum – Short-term	Public toilet. Option of free basic or R 2 for smart option	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1
242	Heritage	Recreation	To provide public amenities (toilets).	✓✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1
243	Heritage	Recreation	To convert the flat of the sappier into public amenities (toilets) which are totally lacking in the core area.	✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1

	Working Group	WG Reference	Verbatim working group Proposal	IP Status	IP Project / Programme	IP action #
244	Facilities	Manor House & Arboretum – Medium-term	Use Manor House, with expansions coming. Fit with master development plan. Filming, events, weddings & celebrations with controls	✓✓	Realisation.. of the Tokai Manor Precinct Plan..	6.1.1
